Personal Projects

News Aggregator Platform - [Link](#)

(Sep 2024 - Present)

- Built a mobile-responsive news aggregator website using React.js containerized with Docker which includes features article search and filtering by keyword, date, category, and source. Additionally, offers a personalized news feed, enabling users to customize their content based on preferred sources, categories, and authors.
- Technologies used : HTML5, CSS, React.js, Context API, Docker, Tailwind CSS, Figma, Git

Personal Portfolio Website - [Link](#)

(March 2023 - April 2023)

- Designed and developed a fully responsive personal portfolio website to showcase web development skills, while applying SEO best practices to enhance visibility and improve search engine ranking.
- Technologies used : HTML5, CSS, SCSS, JavaScript, PHP, Figma, Git

Experience

KOTAK SECURITIES

Bengaluru, India

Frontend Developer

(Sep 2023 - Present)

- **Created Whitelabel Landing Platform:** Created a flexible white-label landing system in Next.js with dynamic content management and theme customization for a personalized experience.
- **Developed Calculator Module:** Built customizable goal and financial calculator module using AngularJS and Bootstrap on the front panel application, allowing users to calculate and invest based on dynamic input data.
- **Implemented Health Insurance Module:** Delivered the Kotak Group Health Insurance module using AngularJS and Bootstrap, enabling users to explore and purchase insurance plans across the front panel and mobile app.
- **Designed Mutual Fund Portfolio Dashboard:** Developed a feature-rich dashboard using AngularJS and Bootstrap, providing users with tools to track, analyze, and manage their mutual fund portfolios efficiently.

Frontend Developer Intern

(June 2023 - Sep 2023)

- **Built Manual Stocks Module:** Developed a feature for tracking and displaying investments on personalized portfolio pages, leveraging AngularJS features like controllers, directives, and routing.
- **Developed KYC Module:** Designed a seamless process for completing KYC on the front panel and mobile app, incorporating document upload and verification using AngularJS and Bootstrap.
- **Created Mutual Fund Import Utility:** Engineered a secure tool using AngularJS to enable users to import external mutual fund portfolios through OTP verification.
